About the hospitals

Carefully selected hospitals across the UK

The hospitals and day-patient units in 'Our Hospital List' are carefully chosen for their quality, value for money and the range of services they provide.

What can I expect?

If you have treatment at one of the private hospitals on this list, you'll normally have your own private room with a television, a telephone and an en-suite bathroom. You'll have a choice of dishes for each meal, and your visitors can usually come and go as they wish (so long as you aren't having medical treatment at the time).

Many operations are now carried out as day-patient cases. This means patients are able to return home the same day.

If you're treated in a high dependency unit or as a day-patient, you may stay on an open ward rather than in a single room while you recover from your operation. An open ward means the nurses can observe you more easily.

What do I do if I need treatment?

Please call us on 0845 600 7696 before you go for treatment.

One of our experienced advisers will check you're covered, help you choose your hospital and specialist, and take you through the claim process.

What if I want to use a hospital that isn't on the list?

We would always recommend that you use a hospital in 'Our Hospital List'. This will mean you can go ahead with eligible treatment knowing that the costs will be covered.

If you choose to have eligible treatment at any other hospital, your policy will only cover part of the costs, and you'll need to pay the rest yourself. Please see your membership handbook for more details.

How do I use this list?

Please check the hospitals and other healthcare facilities in your area, using the map on page 4 as a guide. If you have any questions, please call us on 0845 600 7696.

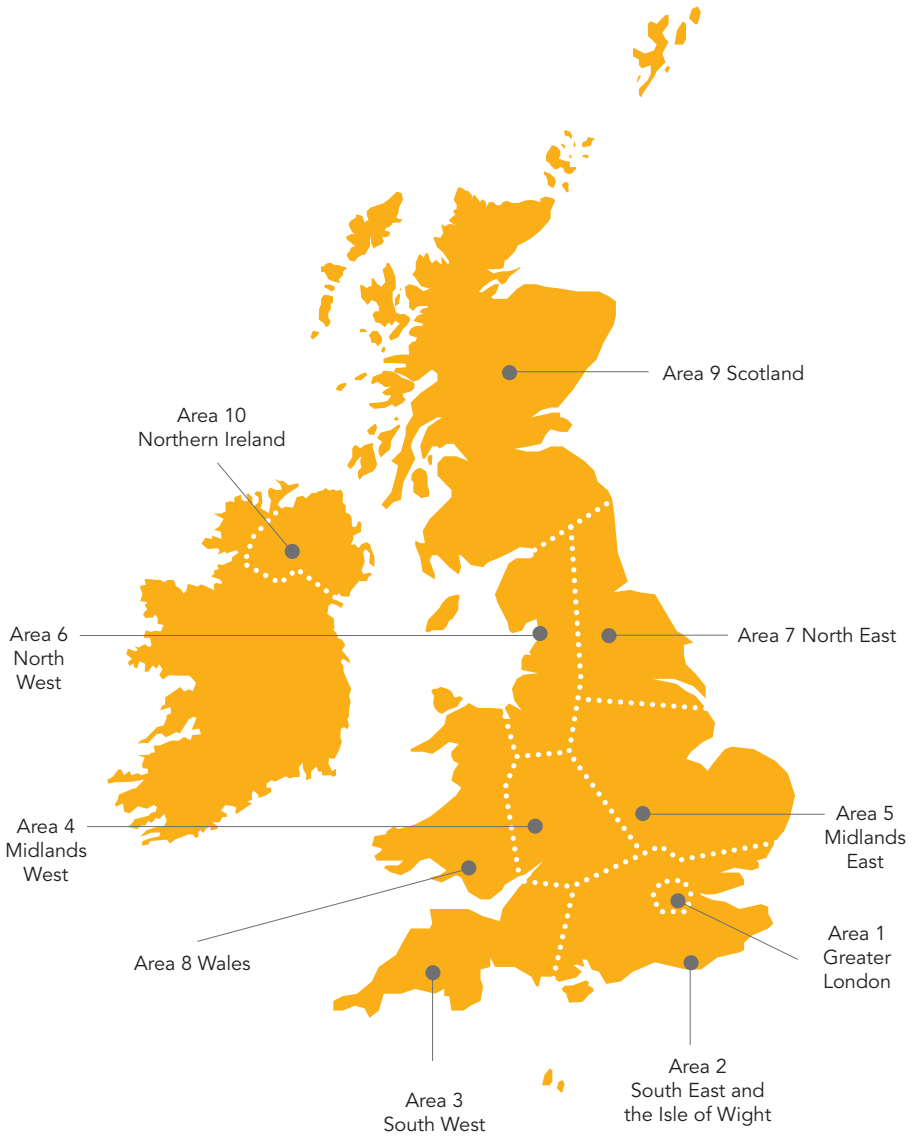

Remember, not all specialists and specialities are available at all hospitals, so please call us so we can confirm which specialists you can use at that hospital or facility.

Will this list ever change?

Yes, there may be rare occasions when we remove or add a hospital or another facility listed on 'Our Hospital List' to maintain the standards of our service to our members. The latest version of this list will be available on our website.

If you call us before arranging any treatment on 0845 600 7696, we can let you know about any changes to hospitals near you.

We may record and/or monitor calls for quality assurance, training and as a record of our conversation.

List of facilities

Key to symbols

You'll see that each entry uses a number of symbols:

Scanning centres – these centres provide:

M MRI (magnetic resonance imaging)
A diamond (◊) indicates that the centre has an open MRI scanner.

C CT (computerised tomography)

P PET (positron emission tomography)

You'll usually have a scan as an out-patient.

G **General hospitals** – acute medical and surgical hospitals and day-patient units.

Ps **Psychiatric hospitals** – hospitals that specialise in the treatment of psychiatric illnesses.

Δ an NHS hospital that doesn't have dedicated private patient facilities. If you use one of these hospitals, we'll recognise an NHS bed nominated as a private bed, but the standard of accommodation may be the same as other NHS beds.
